Volume 14 1988 Table of Contents

No. 1 Red Cell Senescence

pp. 1–312

B.S. Bull: Editorial Note . . . . . A 3

E. Beutler: Isolation of the Aged 1

D. Danon, Y. Marikovsky: The Aging of the Red Blood Cell. A Multifactor Approach 7
S. Piomelli: Commentary 16

G.J.C.G.M. Bosman, M.M.B. Kay: Erythrocyte Aging: A Comparison of Model Systems for Simulating Cellular Aging in vitro 19
G.L. Dale: Commentary: Does Surface Bound Immunoglobulin Mediate Erythrocyte Death? 36
M.R. Clark: Commentary 39
G.J.C.G.M. Bosman: Reply to Commentaries 42

S.A. Landaw: Factors that Accelerate or Retard Red Blood Cell Senescence 47
N.A. Noble: Commentary 60
C. Seaman: Commentary 63
S.A. Landaw: Reply to Commentaries 66

E. Beutler: The Relationship of Red Cell Enzymes to Red Cell Life-Span . 69
H.U. Lutz: Commentary 76
S. Piomelli: Commentary 81
E. Beutler: Reply to Commentaries 87

H. Gershon, D. Gershon: Altered Enzyme Function and Premature Sequestration of Erythrocytes in Aged Individuals 93
E. Beutler: Commentary 99

J. Lowenson, S. Clarke: Does the Chemical Instability of Aspartyl and Asparaginyl in Proteins Contribute to Erythrocyte Aging? 103
E.A. Davidson: Commentary 118

M.R. Clark: Calcium Extrusion by High-Density Human Red Blood Cells . 119
F.F. Vincenzi, T.R. Hinds: Commentary 132
M.R. Clark: Reply to Commentary 135

F.F. Vincenzi, T.R. Hinds: Decreased Ca Pump ATPase Activity Associated with Increased Density in Human Red Blood Cells 139
M.R. Clark: Commentary 149
J. Lowenson, S. Clarke: Commentary 151
A. De Flora: Commentary 153
F.F. Vincenzi: Reply to Commentaries 157

A. Kaushik, T. Matthes, G. Dighiero: Do Natural Autoantibodies Play an Important Role in the Elimination of Senescent or Damaged Red Blood Cells? 161
G. Bosman: Commentary 171
A. Kaushik: Reply to Commentary 173

G. Bosman: Commentary 171
A. Kaushik: Reply to Commentary 173

H.U. Lutz, S. Fasler, P. Stammler, F. Bussolino, P. Arese: Naturally Occurring Anti-Band 3 Antibody and Complement in Phagocytosis of Oxidatively-Stressed and in Clearance of Senescent Red Cells 175
J. Schlepper-schafer: Commentary 196
U. Galili: Commentary 198
H. Lutz: Reply to Commentaries 200

U. Galili: The Natural Anti-Gal Antibody, the B-Like Antigen, and Human Red Cell Aging 205
P. Arese, F. Turrini, F. Bussolino: Commentary 221
U. Galili: Reply to Commentary 225

D. Aminoff: The Role of Sialoglycoconjugates in the Aging and Sequestration of Red Cells from Circulation 229
H. Gershon, D. Gershon: Commentary 248
B.A. Macher: Commentary 250
D. Aminoff: Reply to Commentaries 253

J. Schlepper-Schafer, V. Kolb-bachoffen: Red Cell Aging Results in a Change of Cell Surface Carbohydrate Epitopes Allowing for Recognition by Galactose-Specific Receptors of Rat Liver Macrophages 259
D. Aminoff: Commentary 270
J. Schlepper-Schafer: Reply to Commentary 273

M.M.B. Kay, G.J.C.G.M. Bosman, G.J. Johnson, A.H. Beth: Band-3 Polymers and Aggregates, and Hemoglobin Precipitates in Red Cell Aging . 275
Y. Marikovsky, D. Danon: Commentary 290

M.M.B. Kay, G.J.C.G.M. Bosman, G.J. Johnson, A.H. Beth: Reply to Commentary 292

M.J. Schell, M. Morrison: A Statistical Model of the Timing Mechanism of the Erythrocyte Life-Span 297
E.M. Landaw, S.A. Landaw: Commentary 304
S. Clarke: Commentary 308
M.J. Schell: Reply to Commentaries 310

No. 2/3 Hemopoietic Stem Cell Regulation

pp. 313–564

E.P. Cronkite: Analytical Review of Structure and Regulation of Hemopoiesis 313

M. Ogawa, S.C. Clark: Synergistic Interaction Between Interleukin-6 and Interleukin-3 in Support of Stem Cell Proliferation in Culture 329
Discussion 334

J.F. Eliason, P. Vassalli: Inhibition of Hemopoiesis in Murine Marrow Cell Cultures by Recombinant Murine Tumor Necrosis Factor: Evidence for Long-Term Effects on Stromal Cells 339
Discussion 347

A.C. Eaves, C.J. Eaves: Maintenance and Proliferation Control of Primitive Hemopoietic Progenitors in Long-Term Cultures of Human Marrow Cells . 355
Discussion 365

J.W.M. Visser, P. de Vries: Isolation of Spleen-Colony Forming Cells (CFU-s) Using Wheat Germ Agglutinin and Rhodamine 123 Labeling . . . 369
Discussion 380

H.A. Messner: Growth Factors in Bone Marrow Transplant Recipients . . 385
Discussion 389

T.M. Fliedner, K.-H. Steinbach: Repopulating Potential of Hematopoietic Precursor Cells 393
Discussion 406

H.E. Wichmann, M. Loeffler, S. Schmitz: A Concept of Hemopoietic Regulation and Its Biomathematical Realization 411
Discussion 428

N.M. Gough, D.J. Hilton, D.P. Gearing, T.A. Willson, J.A. King, N.A. Nicola, D. Metcalf: Biochemical Characterization of Murine Leukaemia Inhibitory Factor Produced by Krebs Ascites and by Yeast Cells 431
Discussion 440

W. Oster, A. Lindemann, R. Mertelsmann, F. Herrmann: Regulation of Gene Expression of M-, G-, GM-, and Multi-CSF in Normal and Malignant Hematopoietic Cells 443
Discussion 459

E. Platzer, S. Simon, J.R. Kalden: Human Granulocyte Colony Stimulating Factor: Effects on Human Long-Term Bone Marrow Cultures 463
Discussion 466

A. Raghavachar, N. Frickhofen, W. Digel, F. Porzsolt, H. Heimpel: Lymphokines as Inhibitors of Hematopoietic Cell Proliferation 471
Discussion 480

A. Bacigalupo, G. Piaggio, O. Figari, F. Frassoni, M. Podesta, A.M. Marmont: T Cells and Myeloid Progenitors in Patients With Severe Aplastic Anemia (SAA) 485
Discussion 492

B. Torok-Storb: Hematopoietic Cellular Interactions: Role of the Major Histocompatibility Complex (MHC) 497
Discussion 503

I.N. Rich, C. Vogt, S. Pentz: Erythropoietin Gene Expression in Vitro and in Vivo Detected by in Situ Hybridization 505
Discussion 517

C. Nissen: Hemopoietic Regulatory Factors in Human Hemopoietic Failures 521
Discussion 529

C.R. Bartram: Mutations in Ras Genes in Myelocytic Leukemias and Myelodysplastic Syndromes 533
Discussion 537

B. Löwenberg, M. Salem, R. Delwel: Effects of Recombinant Multi-CSF, GM-CSF, G-CSF, and M-CSF on the Proliferation and Maturation of Human AML in Vitro 539
Discussion 546

D. Hoelzer, A. Ganser, B. Völkers, J. Greher, F. Walther: In Vitro and in Vivo Action of Recombinant Human GM-CSF (rhGM-CSF) in Patients with Myelodysplastic Syndromes 551
Discussion 557

Abstracts 561
